

Endangered Species

Create a **power point** presentation on your endangered animal. All of the questions on the bottom of this sheet are to be answered during the presentation. A minimum of 10 slides are required. You are also to have a bibliography page (minimum of 5 sites), three graphs (one must be a population graph), and professional pictures during your power point.

THE QUESTIONS THAT MUST BE ANSWERED: (If you find other information that is important to your animal... please include this also!)

1. **Animal Description:** (Describe the animal so someone can image what it would look like without seeing it.)
 - a. What does it look like?
 - b. How big do they get?
 - c. Do they have fur or not and why?
 - d. What kind of camouflage does it have?
 - e. How does it defend itself?
 - f. What adaptations does it have to survive?
2. **Animal Diet**
 - a. How does it get it's energy? (Omnivore, Carnivore, Herbivore)
 - b. What organism does it eat?
 - c. What eats it?
 - d. Where is it in the food web/food chain?
 - e. How much food does it need to survive... or how often does it have to eat?
3. **Reproduction**
 - a. How many babies are born?
 - b. How long do they stay with their parents before being on their own?
 - c. What is its size when it is born?
 - d. How many times do they have babies per year? Etc...
4. **Population** Make sure you're numbers are up to date. Explain how an animal becomes endangered. Why is your animal endangered? Etc..
5. **Location**
 - a. (Show maps). Why do they live there and not in other areas?
6. **What is the world doing about your animal being endangered?** Are there laws? Preserves? How are we as humans helping them? Etc..
7. **Explain, in your opinion, whether or not your animal will become extinct or not in the future.** Give me **three ideas** of your own that could help your animal in the situation that it is in now. Etc...
